Founded in 2008 by Suffolk County Nurse Anesthetist Galo Burbano, Blanca’s House works to bring much needed quality medical care to countries and communities throughout Latin America.

Working with medical personnel from throughout Long Island, we are able to provide both preventative and urgent care to patients in outlying communities in South and Central America.

Without our programs, our patients would have limited or no access to treatment and needed surgeries.

All of our team members are volunteers, paying for their own travel expenses and donating their time and expertise for every mission.

“I couldn’t move my leg without pain. The doctors were giving me shots to calm my legs and vitamins for my brain. Three years ago I was recommended by one of the doctors to get a replacement, but I am a poor woman and that wasn’t a solution for me. I am very grateful to Blanca’s House and God for being chosen by the organization to get a replacement. God bless you.”

— Mercedes, 63 years old

“When we arrive, we see medical issues easily treated in the United States. When help is finally sought, medical treatment is beyond the scope of what local doctors can provide.”

— Galo Burbano, CRNA, Founder, Blanca’s House

Help us continue serving people like Mercedes. We need your support!

Blanca’s House
Crossing borders to change lives
Medical Team Abroad
Blanca’s House provides essential medical care including healthcare services, as well as health education, food & school supplies and clothing in local communities throughout Latin America. Offering free healthcare to anyone in need, this program has facilitated care for over 3,000 people in the past 6 years.

Blanca’s Operating Rooms
In order to offer more continuous care, Blanca’s House is constructing four operating suites at the la Clinica Centro de Salud in conjunction with the nonprofit foundation El Cielo para los Niños de Ecuador. A three year project that entails design and construction, as well as the education and training of local staff, our operating rooms will enable us to offer consistent medical care in this rural community in Ecuador.

Junior Volunteers
Offering the unique opportunity to introduce young people from Long Island to medicine, our Junior Volunteer Program allows these students to join us on missions, where they volunteer and observe in and out of the operating rooms.

Blanca’s Kids
At times, our Medical Team Abroad faces cases that cannot be treated locally, as they require more extensive care than can be provided in their local communities. Through Blanca’s Kids, we are able to provide these children with airfare, housing and care, while they receive free medical care on Long Island. Following treatment here, Blanca’s Kids continues to ensure that they receive the continued medical treatment they require in their own countries.
