

Dear Lyme Laboratory Customers,

September 2, 2015

We are happy that you are interested in our laboratory and our free, pre-paid UPS shipping containers. We supply shipping containers/boxes to doctors, labs, and medical institutions. Patients cannot have supplies shipped to them, and they must obtain a transport box from their doctor if needed.

The shipping box is for transport only; it **does not** include any of the blood drawing supplies or specimen collection tubes. We **do not** pay for a pickup in your office/institution, the container must be handed to a UPS driver or dropped off at a UPS location.

Our transport containers meet UN and IATA shipping regulations. Specimens can be sent by other companies as long as they arrive within 2 days and are shipped in an approved IATA package. Specimens can be sent room temperature, but if warm temperatures are anticipated during transport a cold pack or dry ice can be used. We are not open for delivery over the weekend so we suggest you ship within a time frame that will allow the specimen to arrive by Friday.

If you require further shipping information, please call us at (631) 444-3824 Monday-Friday 8 AM-4:30 PM.

Simply fill out the information below and fax the entire slip to (631) 444-7526; there is no need to call for supplies.
