Why Stony Brook?	While living and finishing Medical school in Long Island, I always knew Stony Brook is the place to be. All the attendings here treat everyone with love and support, always take their time to teach, and care about the wellbeing and growth of the residents. The bonds formed with the co-residents and the closeness of the staff gives this program a family feel that is uncommon in all other programs. This program also offers multiple opportunities to expand the resident's knowledge in psychiatry with lectures and hands-on procedure simulations. Finally, the successes of the residents who have graduated from this program speaks volumes about the dedication Stony Brook has to each resident's goals.
