Milestones by Reporting Date

Milestone use and reporting has begun for some specialties and will become effective for all other specialties by December 2015. All subspecialties that are linked to Next Accreditation System Phase I core specialties and some associated with Phase II specialties will report on the Milestones in December 2014. All other subspecialties will formally begin to use the Milestones in 2015. As subspecialty Milestone development is completed, the documents will be posted on the ACGME website. We strongly encourage subspecialty programs to begin working with the Milestones as soon as they become available. This comprehensive table will be updated with hyperlinks to documents as they are posted.
